8+

years building software

MSc

Artificial Intelligence, UNIR

2010

in technology since

10

own systems in development

PROFILE

Full stack software engineer with 8+ years of software development experience and a Master's degree in Artificial Intelligence. I build and maintain production systems with Java, Spring Boot, PHP and TypeScript; design distributed process platforms such as AutoLink, with a B2B gateway and a TypeScript SDK; and apply AI, agents and automation to real problems. A background in IT support, networking, servers and entrepreneurship gives me a full view, from infrastructure to product.

EXPERIENCE

2021 – present

Security Data

Full Stack Developer · Mid-Level

Mar 2024 – present

Full Stack Developer · Junior

Dec 2022 – Mar 2024

Registration Operator & IT Support

Jul 2021 – Jan 2023

- Production systems with Java/Spring Boot, PHP and TypeScript: backend services, APIs, data layers, debugging and refactoring; integration with Asterisk telephony and AI agents.
- **AutoLink**: grew from a Chrome extension into a distributed platform for continuing electronic-signature procedures. An encrypted link restores the request, validates identity (Civil Registry), tax ID (SRI) and in-flight procedures, reuses documents on renewals and routes the user to the next task —biometrics, video, payment or review— on Camunda-orchestrated processes.
- AutoLink B2B gateway for external systems (session, create and state polling) with HMAC authentication and encrypted payloads, a TypeScript SDK for integration and a recovery inbox for failed requests. [AutoLink form](#) · [portal-sd.securitydata.net.ec](#) ↗
- Chrome extensions **SingExtension** and **EC Google Extension** (PDF viewer), plus microfrontends with Angular, Nx and Module Federation for secure document management: Manifest V3, strict CSP, digital signatures and encryption.
- **Security Image**: corporate image manager with configurable link expiration, per-user storage quotas and user administration.

2010 – present

Codeandolo

Independent Software Developer

- Desktop and web applications for clients and own projects.

Jan 2016 – Jul 2017

Explofrap · **Systems Analyst** — Visual Basic development, servers and network architecture.

2014 – 2017

Supercompu TIC · **Founder & Owner** — Technical services and IT solutions company.

2015 – 2016

Grupo Open · **IT Technical Lead** — Support and maintenance across three regional branches.

2012 – 2014

Almacén V&A · **Systems Analyst** — From technical assistant to head of the IT department.

ADDITIONAL EXPERIENCE

2017 – 2021

Diners Club del Ecuador · **Credit Officer** — Credit analysis and credit card portfolio management.

2017 – 2021

Gestiona GTX · **Field Collections Specialist** — Negotiation of overdue and pre-legal portfolios.

2015 – 2016

Marcimex · **IT Sales Promoter** — Technical equipment sales and warranty management.

PROJECTS

Mnemosine	Memory and context for AI agents · V1 in testing Short- and long-term, episodic, semantic and procedural memory with rules, tasks and skills; delivers each project only the context it needs.
EcuApp	Founder · suite of 10 systems in development Business management (inventory, electronic invoicing, education, healthcare), security (authentication, electronic document signing) and applied AI (speech-to-text, text-to-speech, voice cloning, OCR). Java · Spring Boot, Python, PHP · Laravel
Cúspide	Education management system · in production Classes, payments, students and teachers, with a dashboard for enrollments, income, expenses and balance. PHP, Twig operacionadmin.com
Clinical Admin	Clinic management · in production Appointment scheduling by patient, doctor and specialty, with attendance status and email and WhatsApp confirmations. PHP, MySQL clinical-admin.xo.je
Multimodal Early Fusion · Green AI	AI research Multimodal classification with early fusion of tabular data and text, and model efficiency. Python, scikit-learn, XGBoost github.com/JhonnyMinian92/multimodal-early-fusion-green-ai

EDUCATION

2025 – 2026	Master's Degree in Artificial Intelligence Universidad Internacional de La Rioja (UNIR), Spain Thesis: Reproducible software pipeline for multimodal classification of renewal and negotiability intents through early fusion of tabular data and text. Average grade 8/10. Machine Learning, Deep Learning, NLP, Computer Vision, Automated Reasoning and Planning, Cloud for AI, AI Project Management.
2009 – 2020	B.Eng. in Systems Engineering Universidad Técnica de Machala, Ecuador Graduation project: web system for transport management and GPS cargo tracking, published in 2020 (ISBN 9786203032277).

CERTIFICATIONS

AWS Machine Learning Foundations	2026	Python Programming	2025
Java Spring Boot Fundamentals		Object-Oriented Programming with Java SE	
Firebase for Android		Programming Fundamentals	

TECHNICAL SKILLS

Languages	Java, PHP, TypeScript, JavaScript, Python, SQL
Backend	Spring Boot, Laravel, Node.js, Express, REST APIs, Microservices
Frontend	Angular, Microfrontends (Nx, Module Federation), Chrome Extensions (Manifest V3), HTML, CSS
Data	PostgreSQL, MySQL, MongoDB, Redis
AI & ML	Machine Learning, NLP, Computer Vision, AI Agents, Prompt Engineering, scikit-learn, XGBoost, PyTorch
Integration	Camunda (BPM), B2B gateways, TypeScript SDKs, HMAC, payload encryption, Asterisk
Tools	Docker, Git, GitHub, Cursor
Practices	Clean Code, Clean Architecture, Systems Analysis, Technical Documentation
