

Jhonny Darwin Miñan Girón

Software Engineer + AI | Senior Full Stack Developer

Machala, Ecuador | jhonnyminian@gmail.com | github.com/JhonnyMinian92 | linkedin.com/in/jhonnyminian/

PROFESSIONAL PROFILE

Software engineer with professional experience since 2010. I combine Full Stack development, systems analysis, infrastructure, automation and Artificial Intelligence. My main strength is planning and executing ideas until they become production software, not only MVPs. My current professional direction is to manage, use and create projects with and for AI, including agents, contextual memory and automation.

CURRENT FOCUS

I build flexible, people-oriented software. My long-term vision is to create products that adapt not only to each client's needs, but also to the person using the product. I plan scenarios and flows before coding, document the solution, develop, test during and after each task, and document delivered functionality. I currently use AI agents for debugging and development.

KEY EXPERIENCE

Security Data | Senior Full Stack Developer | 2021 - present

Internal progression: Registration Operator ' Junior Full Stack ' MidLevel ' Senior. Java, Spring Boot, Asterisk and Agent AI services.

Codeandolo | Independent Software Developer | 2010 - present

Desktop and web application development with Java, .NET and other technologies throughout the career.

Supercompu TIC | Owner and Founder | 2014 - 2017

Own technical services business for computer equipment and IT solutions.

Grupo Open | IT Technical Lead | 2015 - 2016

Preventive and corrective maintenance across agencies in Huaquillas, Arenillas and Santa Rosa.

Marcimex | IT Promoter | 2015 - 2016

Promotion of IT equipment and accessories plus warranty management. Concurrent work with Grupo Open.

COMPLETE CAREER

Almacén V&A | Systems Analyst | 2012 - 2014

Advanced from technical assistant to technical lead and became responsible for the IT department.

Explofrap | Systems Analyst | 2016 - 2017

Systems analysis, Visual Basic application development, network architecture and server control.

Diners Club del Ecuador | Credit Officer | 2017 - 2021

Credit analysis and portfolio management for Diners Club credit cards.

Gestiona GTX | Field Collections Specialist | 2017 - 2021

Negotiation of overdue and pre-legal portfolios. This period ran in parallel with Diners Club.

ECUAPP AND PERSONAL ECOSYSTEM

EcuApp is the startup I intend to found. Its vision is a software development company focused on personalized products and deep AI integration.

Projects currently in analysis: Hefesto, Atena, Mercurio, Heimdall, Panacea and Tyr.

Mnemosine / Mnemonise: V1 completed and under testing. A central memory and context layer for projects and agents, including rules, tasks, requirements and reusable knowledge.

EDUCATION

Master's Degree in Artificial Intelligence | UNIR | 2025 - 2026

Completed. Thesis defense in September 2026. Final average: 8/10. Areas: unsupervised ML, AI cloud computing, AI project management, NLP, automated reasoning and planning, deep learning, ML and computer vision.

Systems Engineering | Universidad Técnica de Machala | 2009 - 2020

Graduation project focused on transport management and cargo tracking.

Additional training: AWS Machine Learning Foundations (2026) and Python Programming (2025).

CAPABILITIES

Software engineering · Java · Spring Boot · PHP · JavaScript / TypeScript · Python · REST APIs · Microservices · MySQL · PostgreSQL · MongoDB · Redis · Asterisk · AI Agents · Automation · Clean Code · Systems Analysis · Networks · Servers

PROFESSIONAL DEVELOPMENT

Main identified gap: DevOps and large-scale infrastructure. Goal: strengthen operations, scalability, observability and deployment capabilities to support the growth of the EcuApp ecosystem.
